Deaths by Race/Ethnicity

Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by episode date; episode date is defined as the earliest of: case symptom onset date, sample collection date, date of laboratory result, or date of death. Deaths reported in this dashboard include only San Mateo County residents; death data last updated January 25, 2021.

58,750

COVID 19 Vaccinations of San Mateo County Residents

Vaccinations for San Mateo County residents are reported to SMC Public Health via the California Immunization Registry (CAIR2). COVID-19 vaccine administration data are reported as timely, accurately, and completely as data become available. Previous data will change as new and updated data are received.

Vaccine Doses Administered by Date

● Vaccine Doses Administered ● Cumulative Vaccine Doses Administered

Note: The first vaccine dose administered to a resident was on January 04, 2020

Vaccination Series Completed by Date

● Vaccine Series Completed ● Cumulative Vaccine Series Completed

Note: Vaccination series completed indicates that a resident has received the second dose of a two dose COVID-19 vaccine (Pfizer and Moderna) or one dose of a one dose vaccine. Only two dose vaccines are currently approved and available.

Vaccines Administered By

Vaccines Administered

Vaccinations administered as part of federal health care organizations or programs such as the Veterans Administration (VA) and the Pharmacy Partnership for Long-term Care program (through CVS and Walgreens) report to federal immunization systems, may not report into CAIR2, and may not be included in vaccination numbers on the dashboard.
